The Advantages and Disadvantages of Using Mobile Phones to My Life

With phone calls, text messages and emails, all coming into the phone, the mobile phone has become an integral part of people's lives. It is a useful tool.

This is a trend that sending short messages become more and more popular with both the young and the old people. Most of the people have accepted the convenient way of communication.

Recently, we found that some young people even cannot live without the cell phone. Mobile phone seems to be a part of their body.

As to the reasons why so many people are in favors of the short messages, in my opinion, there’re four points.

First, it can save time, by comparison with letters or email. If you want to inform your friends of something in one or two words, short messages are really quicker to receive your friends than others. Now, it seems nearly everybody owns a mobile phone.

Second, short messages cost less than making a phone call. This is the biggest reason to attract students to use it. The young Students send messages more and faster at present.

Third, people who are not very familiar with each other can chat by short messages more easily, through which more and more people can know of others and become friends.

Fourth, from this way, you can express thoughts that you would not say in their presence. Sometimes, you may have trouble finding the right words to speak your minds.
Fifth, in festivals, we can send short messages to wish good luck to other people we known. It brings us a lot of convenience.

There is no doubt that mobile phone provides a convenient way for us to communicate with others without meeting them in person. However, just as everything has two sides, short messages also have many disadvantages.

First, you can be a little out of touch with your friends’ emotions. Language expression ability is got serious obstruction by the method of sending short messages too much. This can cause some misunderstanding in communication.

Second, it may easily lead to us have bad friends. Many of us use cell phone to communicate with our friend. But the question is whether they are all good to you.

Third, the Outlaws cheat or fool others by telling them that they have won some prizes through short messages. There are always bad people around who will take advantage of other people's ignorance. They get money by cheating.

Fourth, cell phone will distract students from listening to the teachers in class. Because sending text messages are silent, it will be not easy to be found by the teacher. So it will have a negative effect on our study.

Six, long time watching mobile phone will affect our vision. Mobile phone radiation on our body has a great impact.

Above all, short message is product of the hitech nowadays. It will serve us very well if we make proper and full use of it.
